SUMMARY

Software Engineer with 2+ years building enterprise SaaS on the Frappe/ERPNext platform and modern JavaScript and Flutter stacks. Experienced in full-stack feature delivery, role-based access control, workflow automation, and offline-first architectures. B.Tech in Artificial Intelligence & Data Science (9.3 CGPA), VIT Pune.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Dart, SQL
Frameworks: Frappe/ERPNext, Vue.js, React, Next.js, Flutter, Node.js
Backend & Data: REST APIs, MariaDB/MySQL, Redis, workflow engines, RBAC/permissions
Frontend: HTML, CSS, Bootstrap, responsive UI, offline-first / sync, SPA architecture
Tools & Practices: Git, Docker, CI/CD, unit testing, code review, Agile/Scrum
Domains: Identity & Access Management (IAM), audit/governance, AI/ML, data mining

EXPERIENCE

Associate Engineer — ElasticRun

Pune, India | Jul 2024 – Present

- Built a Vue.js single-page audit and gap-management dashboard on the Frappe/ERPNext platform, covering record creation, multi-step workflows, and role-scoped work queues for five distinct user personas.
- Designed a role-based access and field-level permission layer enforcing per-workflow-state edit rules across audit and gap processes, integrated with the Frappe workflow engine.
- Engineered an offline-first sync engine and a centralized theming system, delivering consistent UX and reliable operation under low-network conditions.
- Integrated an external incident-ticketing system for automated ticket validation within audit and remediation workflows.
- Drove delivery predictability and reduced post-release defects through AI-assisted code review and pattern analysis across sprints.
- Partnered cross-functionally to translate user feedback into shipped features, owning work from design through production deployment.

Software Engineer Intern — ElasticRun

Pune, India | Aug 2023 – Jul 2024

- Built a cross-platform campaign-delivery package in Flutter enabling dynamic ad delivery and centralized content management across multiple company applications.
- Developed reusable, modular Flutter components with caching to ensure consistent rendering and seamless integration across the app ecosystem.

Lead Web Developer — ActualOne Protocol

Pune, India | Jun 2023 – Sep 2023

- Built the early-stage product MVP using a Next.js full-stack architecture as a founding team member, establishing the frontend and backend foundation.
- Owned end-to-end web development from architecture decisions to production deployment, implementing core features for product validation and user-feedback cycles.

Software Engineer Intern — Solar Secure Solutions

Pune, India | Mar 2023 – May 2023

- Built a reusable React component and widget library, improving code consistency and feature-development velocity across web applications.

Executive Committee Member — IEEE Student Branch, VIT Pune

Pune, India | Jun 2021 – Jun 2022

- Developed the Node.js backend for the branch website, streamlining content management and event operations.
- Built a complete event-ticketing system with real-time validation in 24 hours, supporting seamless entry for hundreds of attendees at an annual tech event.

EDUCATION

B.Tech, Artificial Intelligence & Data Science — Vishwakarma Institute of Technology, Pune

2020 – 2024 | CGPA: 9.3 / 10

PUBLICATIONS

- A Study on Personality Prediction & Classification Using Data Mining Algorithms** — IEEE Xplore, 2023. ML-based system classifying users into personality categories from questionnaire data. (ieeexplore.ieee.org/document/10076743)
- A Review of Document Text Search Using Nondeterministic Automata** — EasyChair Preprint, 2022. Survey in the field of Theory of Computation.

AWARDS

- Kavach 2023 Grand Finalist** — Government of India national hackathon; reached the finals (Indigenous Crypto-Currency Investigation Tool domain) with team Defendify.

- **Polybase Pool Prize — ETHGlobal 2023** — Won a sponsor prize for a team project at the ETHGlobal hackathon.
